

Range: I16-017 Kompan Modular

Being above ground levels trains the child's spatial awareness.

Transparent tubes are designed to challenge the children both physical and psychological level.

The level changes challenge the children's cross-coordination skills as well as their physical strength.

The toddler's develop motor skills by crawling, climbing and by passing through the activities.

The dynamic play solutions encourage the children to be physical and experience the dizzying feeling from swinging between the elastic noodles.
