

Range: I16-114 Kompan Modular

While the children play and have fun, their skillsets develop from the many different types of play; physical, social and cognitive.

By playing sounds the cognitive skills will be developed.

Children need the dizzying input that comes from jumping up and down the trampoline as it helps the child's nervous system to mature.

The open toddler zone allows toddlers to learn and explore the world through play.

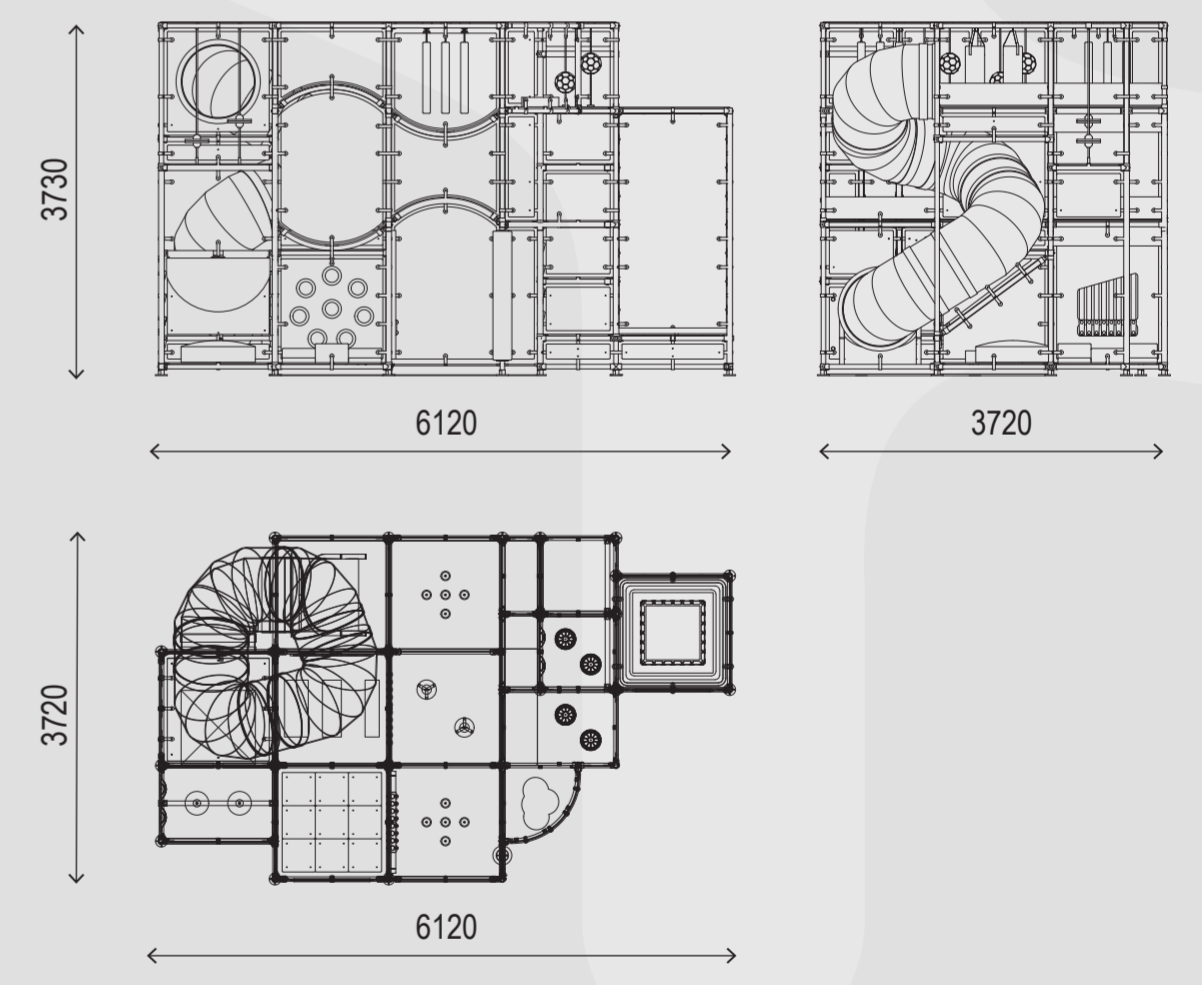

Product information

Activities

- Passage flap
