## Mirror IT063

### Description

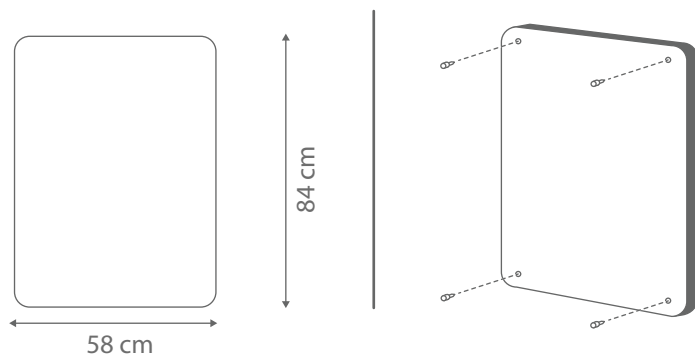

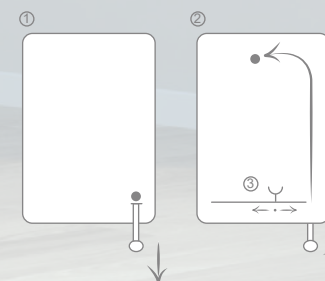

Reflections and deformations always intrigued children. This play unit was especially created for this purpose, to twist and bend and by this take the imagination and creativity of kids by distorting their own image. Is sure that it will boot many smiles and laughter.

## Hidden Eggs IS068

### Description

This game was developed to improve the agility and dexterity of the children. To start the game they have to launch the "egg" in the air by using the trigger and help the bird catching his egg and to bring it back safe to his nest. The egg is represented as a ball. The idea behind this game is to sensitize kids of the importance of protecting animals in their natural environment. Let's help Mr. Bird to take care of his eggs!
